

Vision Correction Surgery Pre-Operative Exam

What to Expect While You Are Here

Congratulations on your decision to have LASER Vision Correction!

This is a very important step in your visual future. Our primary objective is to confirm that you are an excellent candidate for vision correction surgery and to determine which procedure is best suited for your particular needs. This evaluation will take approximately 1 ½ hours. During this time:

- You will have many measurements taken. We will examine all aspects of the health of your eyes, including those directly related to laser vision correction. We will double and triple check your visual prescription. Monovision will be demonstrated if applicable. We will measure the contour and thickness of your corneas. Your ocular pressure will be checked. **You will be dilated during this examination.** You may experience difficulty seeing up close and you will be light sensitive. Please bring sunglasses with you. ***It is quite likely that a number of different people will examine your eyes.*** Precise measurements are crucial to achieving outstanding vision correction outcomes. What may appear to be repetitive is, in reality, a reflection of the meticulous quality of care that **Insight LASIK and Refractive Group** has come to be known for.
- You will have the opportunity to have any remaining questions addressed. Please feel free to ask the doctor or any of our staff member's questions. Our staff specializes in pre-and post-operative care and is happy to answer any of your questions at anytime. We encourage you to review all of our educational materials so you feel fully informed.
- You will review an informed consent. This informed consent ensures that you are well informed about your decision. You will be given the opportunity to ask the Doctor any questions that you have. If you have someone with you, he/she is welcome to join you during your examination.

By choosing **Insight LASIK and Refractive Group** and Dr. Daniel Zimmer as your laser vision correction surgeon, you can be assured of the highest quality surgical skills delivered by your cornea-subspecialty trained surgeon. Dr. Zimmer has extensive experience caring for thousands of laser vision correction patients. Dr. Zimmer will personally review the results of your comprehensive exam prior to your surgery to ensure that your procedure is optimized for your visual condition and personal lifestyle, resulting in the very best outcome possible.

On behalf of all of the staff at Insight LASIK and Refractive Group, welcome and thank you for choosing us for your vision correction needs.
