On a Mission to Save Smiles

As we approach our 10th anniversary, we reflect with deep appreciation on the individuals and companies who have made it possible for America’s ToothFairy: National Children’s Oral Health Foundation® to impact millions of young lives affected by pediatric dental disease. It is because of your unwavering commitment and generosity we are able to continue our fight to eradicate this preventable disease from our nation and its future generations.

Since our founding in 2006, America’s ToothFairy has received tremendous support from the dental industry and, this year in particular, overwhelming receptivity from organizations outside the dental field.

Members of the National Association of School Nurses are utilizing our ToothFairy 101® Community Education Kit to drive oral health literacy in schools. Student chapters of HOSA: Future Health Professionals are exploring dental careers and improving oral health in their communities. Boys & Girls Clubs of America are using America’s ToothFairy educational materials and programs to drive positive oral health behaviors. These “non-traditional” partners have not only delivered vital services to vast populations of vulnerable children, they have sparked enthusiastic local participation to address the critical issue of children’s oral health.

America’s ToothFairy is proud to work with innovative partners like these and many others who understand the imperative to drive a systems change toward prevention of disease, rather than treatment alone, and raise the optics of oral health nationwide.

Harnessing the vast potential of academic and civic organizations, the resources of corporations, the talent of health professionals, and the passion of youth, America’s ToothFairy is committed to creating a world where no child suffers from preventable tooth decay. ★

...because every child deserves a healthy smile!®

Henk van Duijn
Chairman

Fern K. Ingber
President & CEO
The mission of America’s ToothFairy is to eliminate children’s pain and suffering from preventable pediatric dental disease and improve quality of life for at-risk children. As Educator, Preventer and Protector, America’s ToothFairy drives systems change by delivering proven programs and resources that expand access to care and education, improve oral health literacy, and promote overall wellness. Our vision is to create a world where no child suffers from preventable tooth decay.

At America’s ToothFairy, we believe every child deserves a healthy smile. Promoting the importance of oral health and its link to overall health, America’s ToothFairy supports the delivery of oral health education and care for vulnerable children across the country.

Since its inception, America’s ToothFairy has distributed more than $15 million in vital community-based programs, educational materials, oral care products, and financial grants through our national network of Affiliate partners and community programs.

More than 2.2 million children and caregivers received oral health services through America’s/Canada’s ToothFairy programs.
In its second year, the America’s ToothFairy Smile Drive mobilized a vast network of youth, dental professionals, companies, and volunteers in a national campaign to collect toothbrushes, toothpaste, and other oral care products for underserved children. Raising widespread awareness of the importance of oral health and its connection to overall health, the America’s ToothFairy Smile Drive has national reach yet sparks both local participation and local impact for the benefit of children in need.

More than 660,000 oral care products have been collected for children in need over the last two years.
The #MySmileMatters Youth Movement engages youth in the national oral health crisis by mobilizing them as community educators and advocates. By focusing their efforts on achievable objectives and providing step-by-step plans, resources, and incentives, youth leaders are making a positive impact on the health of their communities and raising the conversation of oral health nationwide.

"Gratification and words alone cannot express the rewards these girls have experienced working with America’s ToothFairy. The life lessons of working with others, compassion, drive, focus, and setting goals are just a few of a long, long list. I am grateful for the priceless lessons they are learning. We look forward to a growing, long-lasting relationship with America’s ToothFairy!"

- Cherie Wink
  Yorba Linda High School Girls’ League

595,494 children and teens were reached with oral health education through #MySmileMatters
Kids Club

The America’s ToothFairy Kids Club promotes healthy smiles for young children and their families through free monthly online educational activities, tips and letters from the ToothFairy. Children can participate individually at home or as a group through their school or other youth settings, helping to reinforce classroom activities, clinic visits and wellness initiatives. El Club de los Niños, our Spanish-language Kids Club, launched in 2015.

Tomorrow’s Smiles

Tomorrow’s Smiles® connects youth in need of comprehensive restorative care with caring dentists willing to provide pro bono services. Participants experience a life-changing transformation as they gain the smile they always wanted and the confidence they need to pursue their goals. Teens receiving treatment from a Tomorrow’s Smiles dentist “Pay it Forward” by teaching oral health lessons to younger children using the ToothFairy 101® Educational Curriculum.
Boy and Girl Scouts are rewarded for community oral health activities through the Real Life ToothFairy and SuperHero Patch Programs. Scouts of any age can discover oral health, connect with their communities and take action to fight pediatric dental disease. As part of the #MySmileMatters Youth Movement, Scouts emerge as young oral health leaders and community ambassadors for children’s health.
Students United with America’s ToothFairy

Students United with America’s ToothFairy® engages students in high school, college as well as dental, nursing, pre-dental, and dental hygiene programs across the country in activities focused on breaking the devastating cycle of pediatric dental disease. Students lead vital oral health education programs, host health fairs, institute toothbrushing programs in local schools, provide screenings and preventive services as appropriate, and promote positive oral health behaviors.

“Starting a Students United with America’s ToothFairy chapter at the University of Kentucky has made me more aware of the oral health education need of our community. It has continually reminded me of why I want to become a dentist and serve these underprivileged populations.”

- Ailey Layson
  University of Kentucky student leader
Offering multiple opportunities to teach and reach vulnerable children, America’s ToothFairy engages dental professionals in a widespread effort to improve oral health literacy and increase access to care for children in their communities. America’s ToothFairy volunteer dental professionals are active in every state in the US, Canada and military bases throughout the world, providing vital educational outreach and pro bono services.

Practice of Distinction

The Practice of Distinction Program provides dental practices with an opportunity to highlight their commitment to children’s oral health through alignment with a smile-saving cause. Participating practices receive educational resources, practice-building marketing tools, and opportunities to enhance their outreach through community engagement and positive publicity.
76,233 youth, caregivers and pregnant mothers received oral health education

Founded with a generous gift from Esther Wilkins, RDH, DMD, the Esther Wilkins Education Program builds on the role of dental hygienists and dental hygiene students as oral health champions by providing educational resources for community outreach. Members improve oral health literacy and promote positive oral health through community outreach activities in their local communities and mission trips around the world. In partnership with the International Federation of Dental Hygienists, state coalitions, and 195 dental hygiene programs, Esther Wilkins Education Program members have reached thousands of children in every state, throughout the US, and internationally.
America’s ToothFairy programs integrate into a powerful, comprehensive oral health initiative under our Oral Health Zone Program model. The first America’s ToothFairy Oral Health Zone Program® was established in Washington, DC in 2010. Over the last five years, additional Oral Health Zones have been created in the Bay Area (CA), Orange County (CA), Arkansas, and Minnesota with developing Oral Health Initiatives in North Dakota and Texas. Engaging all local stakeholders in a collaborative approach, the Oral Health Zone drives systems change, while promoting positive oral health behaviors, raising awareness and delivering preventive and treatment services for vulnerable children.

Orange County

Now reaching four counties and more than 162,000 children and caregivers, the Orange County Oral Health Zone is strengthening a regional focus on oral health. Community partners of the Orange County Oral Health Zone include Early Head Start, Head Start Health Specialists and Parent Volunteers, AltaMed, Orange County school nurses, and Assistance Leagues. By linking stakeholders with direct service Affiliates and integrating America’s ToothFairy educational materials into local outreach programs, an increased proportion of Orange County’s vulnerable children are receiving vital services each year. With an invitation to expand oral health programming to all southern California Head Start programs and a new partnership with the Los Angeles Trust for Children’s Health reaching the 650,000 students in the L.A. Unified School District, the Orange County Oral Health Zone is poised to make a major impact in its third year.

Made possible with generous support from The Larry & Helen Hoag Foundation
Thanks to generous support from the Delta Dental of Minnesota Foundation, the Minnesota Oral Health Zone reached more than 194,000 children and caregivers this year. Now collaborating with 44 community partners, three pilot communities and 12 Affiliate clinics and programs, the Minnesota Oral Health Zone expanded educational opportunities and provided support for dental care across the state. Key community partners include Head Start, School Readiness, Early Childhood Family Education, the Minnesota Dental Association and a number of county public health and human services departments. The Minnesota Oral Health Zone has been influential in a number of statewide policy initiatives including the Sealants in the Schools program, Fluoride Advisory Committee, Born to Thrive and Help Me Grow systems work, the Child Care and Development Block Grant plan for infants and toddlers and others.

Made possible with generous support from

DELTA DENTAL OF MINNESOTA FOUNDATION
Bay Area

With an annual reach of more than 76,000 children, parents and caregivers, the Bay Area Oral Health Zone is impacting families in six counties. As a contributor to the San Francisco Children’s Oral Health Strategic Plan, the Bay Area Oral Health Zone continues to play an instrumental role in both strategic planning and implementation of regional oral health programming. In addition to strong partnerships with a number of prestigious universities, the Bay Area Oral Health Zone is now partnering with 50+ Head Start sites, YMCAs, WIC, school districts and after-school programs. A new affiliation with the Native American Health Center in Oakland provides the opportunity to support a wide range of services in the Alameda County Unified School District and Head Start.

Made possible with generous support from

Arkansas

The Arkansas Oral Health Zone Program reached 26,171 children and caregivers with vital oral health education and services in its first year. In collaboration with the Arkansas Department of Health Office of Oral Health, Arkansas Oral Health Coalition, Arkansas State Dental Hygienists’ Association, the Arkansas Office of Minority Health and Health Disparities, as well as local community partners, safety net clinics, civic organizations, youth and health professionals, the Arkansas Oral Health Zone Program is raising awareness of the importance of oral health, promoting preventive strategies and delivering preventive and treatment services for vulnerable children. In the coming year, the Arkansas Oral Health Zone will formalize its relationship with Arkansas Head Start and work with school-based health centers across the state to improve access to care and oral health education.

Made possible with generous support from
The National Capital Area Oral Health Zone continues to engage existing and new partners throughout the District of Columbia and surrounding counties in Maryland and Virginia. Students United with America’s ToothFairy chapters at Howard University School of Dentistry, Georgetown University, University of Maryland, Johns Hopkins University, and George Washington University provided dynamic oral health education at school visits and outreach events. The National Capital Area Oral Health Zone has also formed strong community partnerships with child development centers, school programs, oral health coalitions, Girl Scouts Council of the National Capital Area and United Way of the National Capital Area.

Oral Health Initiatives

Texas

Our school-focused Texas Oral Health Initiative began in early 2015 in partnership with Delta Dental Insurance Company. With a special focus on the Latino American community, this initiative is engaging Texas youth in the #MySmileMatters Youth Movement and equipping school nurses to provide oral health education. Through utilization of the ToothFairy 101® Community Education Kit, educational presentations, and health fairs, children in nine school districts of Houston and Dallas/Fort Worth are receiving the tools they need to improve their oral health.

North Dakota

In collaboration with the state dental director, North Dakota Department of Health, North Dakota Oral Health Coalition, and National Association of School Nurses, our North Dakota Oral Health Initiative is working to position non-traditional community partners as oral health advocates. A volunteer network of paramedics, school nurses and other health professionals are providing oral health education for North Dakota youth and their caregivers with potential to reach more than 40,000 children across the state.
The America’s ToothFairy Affiliate Network is a collaborative alliance of leading university dental and dental hygiene programs, hospitals, community clinics, mobile dental programs and school-based programs providing comprehensive oral health services to disadvantaged families. We are proud to partner with this growing network of non-profit providers committed to providing vital oral health services and delivering oral health education at every encounter with a child.

97% of reporting Affiliates stated America’s ToothFairy educational materials were effective in positively influencing behavioral change.
Thanks to these generous Corporate Underwriters, 100% of your donation goes directly to smile-saving programs.
America’s ToothFairy held its inaugural Virtual ToothFairy Ball and Online Auction in November 2014. Individuals and corporations sponsored the event by purchasing one or more virtual “tables” and donating items for the auction. More than $200,000 was raised, and each $5,000 table sponsorship was awarded as a named ToothFairy Grant to support smile-saving programs from coast to coast.

“Just Kids Dental provides oral health education and preventive dental services to rural underserved children throughout Minnesota and Wisconsin who truly face severely limited access to dental care. We are grateful for your compassionate community giving through this ToothFairy Grant which allows us to make a difference in these young lives.”

- Stacey Anderson
Executive Director, Just Kids Dental
Thanks to the support of individuals and corporations for the ToothFairy Ball and other programs, America’s ToothFairy awarded $270,000 in financial grants for community oral health initiatives and clinical programs to expand delivery of oral health services for underserved children.

Program Partners

America’s ToothFairy Program Partners are major national service organizations that share our commitment to providing oral health services and education to vulnerable populations. Leveraging the national reach and expertise of this network, America’s ToothFairy is optimizing resources to reach the greatest number of underserved children and families.

FY 2015 Highlights:

- In partnership with Boys & Girls Clubs of America, 369,410 children and teens were impacted through oral health educational programming.

- As part of the #MySmileMatters Youth Movement, high school students with HOSA: Future Health Professionals of America reached 206,770 children through community outreach programs.

- Members of the National Association of School Nurses used America’s ToothFairy educational kits and resources to provide oral health instruction to 133,539 students in schools across the country.
