

## ***iWellness Examination***

**Early detection** of glaucoma, macular degeneration, diabetic retinopathy, and other retinal diseases is crucial to preventing blindness. Often painless, these retinal diseases slowly cause the nerves in your eyes to degenerate.

**The advanced technology** of the *iWellness Examination* allows us to look beyond the surface the retina and observe structural changes that may not be visible with other procedures. Similar to an MRI or CT scan, with the *iWellness Examination* we can detect ocular diseases and problems that can develop without warning and can progress without symptoms.

**Timely diagnosis** of a sight-threatening disease allows for easier treatment, frequently slowing disease progression and avoiding vision loss.

**The *iWellness Examination*** is a screening for diseases. Medicare and most insurance companies do not cover a screening procedure. If a disease is detected, and additional tests are ordered, those additional tests would be covered by your insurance.

Comparable to your annual dental X-Rays, this simple procedure should be performed annually.

**Your eyesight is priceless.** You have entrusted us to protect it. The innovative *iWellness Examination* is an important part of the technology that allows us to provide that protection.

**The minimal fee for the protection provided by the *iWellness Examination* is \$64.**

**I elect to have the *iWellness Examination* (please circle one) **Yes** **No****
