EMILIO MARTIN JUSTO, M.D.
*Cosmetic and Eye Surgeon
Medical Director*

EUGENE SHIFRIN, O.D.
Doctor of Optometry

MANUEL ZAMBRANO, O.D.
Doctor of Optometry

To My Valued Patients,

For the past 30 years I have been treating patients with great care and compassion and am proud to have developed a successful ophthalmology and cosmetic surgery practice for which I am extremely grateful. Over those 30 years of practice I have performed thousands of cataract surgeries and thousands of cosmetic surgeries. At this time because our team has grown and we have been able to help so many patients improve their quality of life I am now committing the majority of my time to performing surgery. I will still be in clinic a limited number of days in order to perform surgical consultations in order to evaluate each patient's eyes prior to any surgical procedure.

I am well aware that these types of transitions within a medical practice can be a cause for concern but I want to reassure you that you will be well taken care of. I would prefer that you continue your medical eye care with one of our two outstanding Medical Optometrists, Dr. Eugene Shifrin, O.D. or Dr. Manuel Zambrano, O.D., each of which has extensive knowledge, training and experience (almost 40 years combined experience) in the diagnosis and management of glaucoma, macular degeneration, diabetic retinopathy, dry eyes, contact lens fitting and the like. Dr. Shifrin and Dr. Zambrano work closely with our wonderful team as well as with me. They are both very skilled and I feel confident that you and each of my patients will be in excellent hands under their care. In the unusual circumstances that either Dr. Shifrin or Dr. Zambrano need for me to render a second opinion, our new system will allow for prompt referral to me for consultation, whether it be surgical or medical.

You can be rest assured that our new protocol will allow for a seamless transition and 100% continuity of your eye care as all of the existing patient records are available to our entire team. We know your medical eye history the best and our team communicates daily with me regarding all our patients.

Please understand if you do require any surgical evaluation for cataracts, each and every patient sees me for a complete dilated medical examination as well as my own surgical evaluation and discussion regarding your candidacy and your potential surgery. All eyelid surgery prospects also will see me for an eyelid consultation and comprehensive discussion regarding any proposed surgery.

In summary, I trust your understanding that you will continue to receive stellar vision care as well as medical eye care and that I personally value you, as well as each of your past and future referrals, to our growing 30+ year medical practice!

Sincerely,

Emilio M. Justo, M.D.
