

Dr. Mark Samani

Prosthodontics
NJ Specialty Permit No. 3916

With 20+ years of experience, Dr. Samani is at the forefront of prosthodontic care and specializes in advanced adult restorative, implant and aesthetic dentistry. Dr. Samani lectures extensively on all aspects of restorative implant dentistry, ranging from full mouth immediate load techniques to factors influencing single tooth implant success. Dr. Samani has been on staff at Rutgers School of Dental Medicine since 2000 as an Adjunct Assistant Professor. He currently heads the senior lecture series on current concepts in implant dentistry.

Dr. Jin Ha Joung

Diplomate of the American Board
of Periodontology
Prosthodontics & Periodontics
NJ Specialty Permit Nos. 5871 & 5872

Dr. Joung is one of only a handful of dentists in the country to be trained in two specialties. As a dual specialist, he has a unique perspective in comprehensive care and treatment planning the complex case. He received his B.A. & D.M.D. from the University of Pennsylvania and his specialty training at the University of Connecticut. He was awarded recognition for excellence by the American College of Prosthodontics. He is also a Diplomate of the American Board of Periodontology and lectures on all aspects of prosthetic dentistry, periodontics and the surgical/restorative aspects of implant dentistry.

Course Dates:
9/26/19, 10/24/19, 11/21/19,
1/16/20, 2/13/20, 3/12/20

THE ALL-on-4[®] MINI-RESIDENCY

RIDGEWOOD
IMPLANT
INSTITUTE

www.RidgewoodDental.com

COURSE OBJECTIVE

To provide the knowledge and skills to successfully identify and treat patients that are candidates for All-on-4 types of full arch implant restorations.

COURSE OUTLINE

- Treatment planning
- Case selection
- CBCT imaging and evaluation
- Digital planning
- Hands-on model based training
- Live observation of surgical procedures
- Immediate denture conversion
- Live treatment of prosthetic procedures

COURSE INFORMATION

Through didactic, live-patient observation and hands-on training, participants will learn the steps necessary to predictably provide this treatment modality. The course will include a combination of lectures to review the entire process and treatment planning/CT evaluation, seminars and live patient treatment. During the surgical treatment, participants can observe from within the surgical suite or the conference room. The conference room is equipped with a live video feed from the surgical suite as well as 2-way audio capabilities. Surgical topics from flap design, bone reduction, grafting, implant placement, abutment selection and suturing will be discussed. Immediate denture conversion to a screw-retained provisional prosthesis will be completed on patients and reviewed with participants. Participants will also experience this conversion with model-based lab learning. The prosthetic phase of treatment will also be observed and reviewed along with the laboratory steps used to facilitate the restorative process.

PATIENT RECRUITMENT

Patients will be provided by the Ridgewood Implant Institute. However, should you have a patient who might be interested in participating in this CE course, there can be a reduction in tuition costs for the doctor. Please contact our office to schedule a screening appointment for the patient.

Tuition \$2995
CE 24 hours of credit
