SEMEN ANALYSIS COLLECTION PROCEDURE

Semen Analysis is by appointment only and can be scheduled by calling 210-692-0577.

- We can conduct semen analysis by appointment only, Monday - Friday between 7:30 - 9:00 am
- Allow yourself **3-4 days** of abstinence prior to collecting your sample. This is very important as longer or shorter periods of abstinence can affect test results adversely. If an appointment is not cancelled at least 24 hours in advance you will be charged a \$50.00 fee.
- The sample is collected by masturbation directly into the specimen container provided. We are pleased to provide a sterile specimen container if needed. Any type of lubricant is prohibited. It is important that the entire sample be collected: for this reason, interrupted intercourse is unacceptable.
- It is **REQUIRED** that the husband shows a photo ID when the sample is brought to the center.
- Please write the full name of both husband and wife, the time of collection and the days of abstinence on the container label. **The cost for the analysis is \$75.** Payment is due at the time of service and can be made by check, cash or credit card. Be sure to bring this form with you, as this is required by law.
- Samples can be collected in our facility or brought to the lab within 1 hour of collection. It is preferred that motility be evaluated within 30 minutes of collection. The sample should be protected from extreme heat or cold. If you live out of town, or cannot reach the lab within ½ hour - 1 hour after collecting the specimen, please let us know so that special arrangements can be made.
- Results will be faxed and mailed to your referring physician, and you may contact their office for the results. If you have any questions, please feel free to call the lab at (210) 614-3232.

For your convenience, a map to our office is located on the back of this form. Please contact our office if you have any further questions or concerns
