SALUTE TO EXCELLENCE

PATIENTS ARE PRIORITY #1

Patients at aesthetic DentaCare quickly recognize that their positive experience is the clinic's highest priority.

Dr. Podilsky and his team are committed to getting the best results possible for every patient's smile, whatever the specific need. Achieving those results starts with making patients feel comfortable and confident prior to any decisions or treatments. In no-charge consultations, patients are encouraged to ask questions and to be fully informed of the treatment options and procedures best suited to their goals.

Complete blood pressure checks, health assessments, and oral cancer screening precede treatment. The treatments themselves are delivered in the most comfortable environment imaginable with massage chairs and paraffin wax treatments for patients' hands to help them relax (a hit with women and men alike).

Within that comforting environment, aesthetic DentaCare provides a comprehensive range of treatments from general and family dentistry to implants, veneers, and teeth whitening. The OraVital™ System breath treatments enhance confidence. The Invisalign procedure can reshape a smile without the drawbacks of traditional braces.

One of the first things people notice about you is your smile. Shouldn't it be beautiful and radiant? There is no reason to feel self-conscious about your smile. Contact Dr. Podilsky to discuss ways to make your smile the introduction you desire. Phone 780-428-6846 or visit www.cosmeticdentistryedmonton.com.
