

PerioGard

PerioGard is a prescription only mouth rinse that kills the bacteria in your mouth that causes cavities, white spots and swollen gums. The actual drug name is Chlorhexidine Gluconate. Your pharmacist will give you more information and answer any further questions you may have about the prescription.

Instructions for use:

1. Brush and floss thoroughly with your regular toothpaste.
2. Rinse with ½ oz. (marked on the supplied dosage cup) for 30 seconds
3. Spit any excess out of your mouth but DO NOT RINSE.
4. DO NOT EAT OR DRINK FOR 30 MINUTES FOLLOWING TREATMENT!
5. Do this at least twice a day. We recommend immediately after school and prior to bed.

Swollen, red puffy gums as well as plaque buildup

White spots caused by plaque buildup, resulting in loss of hard minerals
